

## Anglo Haskell 2008

Matthew Sackman announced AngloHaskell 2008, a gathering of all people Haskell-related from beginners, to seasoned hackers to academic giants. All and more are welcomed by large fuzzy green lambdas. The proposed dates and location are Friday the 8th and Saturday the 9th of August, at Imperial College, London.

## CFP - Special Issue of Fundamenta Informaticae on Dependently Typed Programming

Wouter Swierstra announced a call for papers for a special issue of Fundamenta Informaticae on Dependently Typed Programming. The deadline for submissions is October 1.

## Gtk2Hs 0.9.13

Peter Gavin announced the release of Gtk2Hs 0.9.13, including bindings for Gnome VFS and GStreamer, a new Gtk+ tutorial adapted by Hans van Thiel, cairo image stride support, and more.

## Hasim

Jochem Berndsen announced Hasim, a small project to create a library to do discrete event simulation in Haskell, using monads to define a domain-specific language for "actions" of a process.

## Galois move

Don Stewart announced that Galois has completed the move of its data center. Expect speedier response times for [hackage.haskell.org](http://hackage.haskell.org) and [darcs.haskell.org](http://darcs.haskell.org).

---

## Jobs

### Formal methods and automated reasoning at Rockwell Collins

Janis Voigtlaender passed on an opening for a Senior Systems Engineer at Rockwell Collins. The opening is for a computer scientist or engineer to develop and apply automated analysis to computer systems and to pursue research in formal methods and automated reasoning. Contact: [rmgatto@rockwellcollins.com](mailto:rmgatto@rockwellcollins.com).

## Quotes

- *quicksilver* [on what OS sjanssen uses] sjanssen runs haskell programs in his head; much more efficient.
- *EvilTerran* "We were somewhere around Barstow, on the edge of the desert, when the phantom types began to take hold."
- *audreyt* o/ the phantom of the typesystem is here / inside my mind! o/
- *dmwit* No, no, no, (\$) isn't right-assoc, it's wrong-assoc.
- *solrize* this would never happen in haskell: i sent in a search query to a certain python program, but left the query field empty, expecting to get back an error message. instead it found a bunch of books written by the diet doctor Gary Null.
- *heatsink* We're all inside do-blocks in the IO monad if you think about it.
- *djsiegel* [upon having a question answered by dons] oh my, I'm talking to the man
- *mar77a* the first computers were big because they were actually cupboards with fast humans inside
